## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group III (claims 6-10) in the reply filed on 09/27/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.

Art Unit: 3721

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(f) BRIEF SUMMARY OF THE INVENTION.

(g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(h) DETAILED DESCRIPTION OF THE INVENTION.

(i) CLAIM OR CLAIMS (commencing on a separate sheet).

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: applicant needs to insert headings such as "BACKGROUND OF THE INVENTION"; "BRIEF SUMMARY OF THE INVENTION"; etc.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(claim 6, line 2) "...optionally multiple part,..." is vague and indefinite because it is not clear what applicant is referring to, what is that "multiple part"?

(claim 6, lines 3 and 4) "...the carrier (8) has fixing points for receiving.." is not clear as of "receiving" what?; etc.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 3721

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsuji et al. (5,230,146).

Tsuji discloses packaging for a cable harness (10) with a packaging enclosure (Fig. 8; via box 41) and an optionally multiple part, template-like carrier (Fig. 3; via holding frame 16 and rollers 18), characterized in that the carrier (18) contacts and if necessary is fixed to contacts and fixings of the packaging enclosure (41); and the carrier (18) has “fixing points for receiving” and fixing holding points (Fig. 7; via 21) of the cable harness (10).

Regarding claim 7: characterized in that the carrier (18) has markings, which allow the packaging device or unpacking device to identify the position of the carrier and its fixing points, e.g., optically, magnetically, electrically, or by touch (Fig. 7; via rod 21 moves up and down between carrier 18).

Regarding claim 8: a cable harness (10), characterized in that the holding points (via 21) of the cable harness (10) represent markings, which allow the packaging device or unpacking device to identify the position of the carrier and its fixing points, e.g., optically, magnetically, electrically, or by touch (Fig. 7; via by using rod 21 between rollers 18).

Regarding claim 10: characterized in that the fixing points for the holding points are cut-outs in the carrier (18); via the space between rollers 18 to permit 21 move up and down in between them.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuji et al. (5,230,146).

Tsuji does not disclose that the packaging enclosure (41) consists of corrugated cardboard. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have substituted Tsuji's enclosure 41, by having corrugated cardboard enclosure, as a matter of engineering design choice, in order to use lighter enclosure and make it easier for moving the enclosure around. Alternatively, the examiner takes an official notice that using cardboard containers for such packaging is old, well known, and available in the art.
